WATER SAMPLING INSTRUCTIONS FOR WATER QUALITY ANALYSIS

Important: Take water sample when it can be returned within 24 hours after taking the sample.

1. Please fill-in name and address, sampling location, date and time sample was taken.
2. Run cold water to be sampled for at least **5 minutes**.
3. After running water for 5 minutes, shut off and remove aerator if faucet has one and flame the faucet (if it is not plastic), or disinfect with alcohol.
4. Turn faucet on softly and **fill both plastic containers** to the bottom of the neck without touching the inside of the cap or the inside of the container. DO NOT FILL NECK.
5. Screw cap on tightly.
6. Return sample to New England Radon within 24 hours. Use Priority Mail for overnight service. Postage is required.
7. Keep refrigerated prior to shipment.

* We recommend running an idle well at least overnight, then stop running and rest well for a few hours to be sure you are checking the water that will be in use.

PLEASE PRINT LEGIBLY IN THE SPACES PROVIDED BEELOW. REPORT WILL BE MAILED TO THE ADDRESS BELOW. SAMPLE CANNOT BE PROCESSED UNLESS COMPLETE INFORMATION IS PROVIDED.
